

Squall Leonhart

****Senior Engineering Leader / Director of Engineering****

squall.leonhart@balamb.com | (555) 014-8842 | San Francisco, CA | github.com/Cloudywithach

Summary

Senior engineering leader with 25+ years building and scaling distributed systems and Clou

Experience

Esthar Cloud's Systems · Director of Engineering (2019 · Present)

- * Led 40-person engineering org across platform infrastructure and reliability teams suppo
- * Drove Cloud's cost optimization program reducing annual infrastructure spend by 28% acro
- * Built engineering governance framework spanning DORA metrics, incident review, and archi
- * Scaled organization from 18 to 42 engineers across 6 teams with 92% offer acceptance rat
- * Launched multi-region failover architecture achieving 99.99% availability for tier-1 ser
- * Partnered with product leadership to define roadmap for platform services serving 500+ i

Balamb Garden Technologies · Senior Engineering Manager (2015 · 2019)

- * Managed 24-engineer platform team building internal developer platform and CI/CD tooling
- * Improved deployment frequency 4x while reducing change failure rate from 18% to 5% via p
- * Led migration from monolith to service-oriented architecture across 30+ services with ze
- * Introduced engineering excellence program spanning code review standards, testing cultur
- * Grew team from 12 to 24 engineers; promoted 6 engineers to senior or staff level over te

Timber Networks · Engineering Manager (2011 · 2015)

- * Led 12-engineer team building distributed networking and messaging infrastructure
- * Designed and shipped high-throughput event streaming platform handling 2M events/sec at
- * Reduced p99 latency by 40% through systematic bottleneck analysis and protocol optimizat
- * Established incident response process reducing mean time to resolution from 90 to 25 min

Dollet Data Labs · Senior Software Engineer (2007 · 2011)

- * Built distributed data pipeline processing 8TB/day across multi-tenant analytics platfor
- * Owned service ownership model adoption across 15 teams, improving operational accountabi

Early Career Highlights

- * Software Engineer at Galbadia Logistics (2003 · 2007): built routing optimization servic
- * Junior Software Engineer at Trabia Systems (1999 · 2003): developed internal tooling and

Skills

| Engineering Leadership | Platform Engineering |

| --- | --- |

| Org Design & Scaling | Kubernetes & AWS |

| DORA/SPACE Metrics | Service-Oriented Architecture |

| Engineering Governance | CI/CD & Developer Tooling |

| Cost Optimization | Distributed Systems |

| Incident Management | Multi-Region Deployments |

Education

B.S. Computer Science · Fishermans Horizon Technical Institute (1999)
